

TO: West Virginia Healthcare Providers, Hospitals and other Healthcare Facilities

**FROM: Rahul Gupta, MD, MPH, FACP
Commissioner and State Health Officer
West Virginia Department of Health and Human Resources, Bureau for Public Health**

DATE: July 17, 2017

LOCAL HEALTH DEPARTMENTS: PLEASE DISTRIBUTE TO COMMUNITY HEALTH PROVIDERS, HOSPITAL-BASED PHYSICIANS, INFECTION CONTROL PREVENTIONISTS, LABORATORY DIRECTORS, AND OTHER APPLICABLE PARTNERS

OTHER RECIPIENTS: PLEASE DISTRIBUTE TO ASSOCIATION MEMBERS, STAFF, ETC.

This Health Advisory serves as a reminder to all healthcare providers and laboratorians to report outbreaks, communicable diseases, and unusual conditions or emerging infectious diseases during the National Boy Scout Jamboree as required by the West Virginia Legislative Rule for Reportable Diseases, Events and Conditions (64CSR7). West Virginia will host the 2017 National Boy Scout Jamboree from July 19-28, 2017 at the Summit Bechtel Family National Scout Reserve in Mount Hope, West Virginia. The 2017 National Boy Scout Jamboree is anticipated to be the largest mass gathering in the State's history with over 40,000 scouts and staff from all over the United States and nearly 1,000 international scouts from over 80 different countries. The event is expected to bring an increased number of visitors to Fayette County and the surrounding areas. Additionally, scouts and thousands of additional youth and volunteers will be performing an estimated 500,000 hours of community service in all 55 West Virginia counties.

The West Virginia Bureau for Public Health is working with the Boy Scouts of America to track and monitor reports of illness, injury or disease. Outbreak detection and response activities will be enhanced over the course of the event.

Situations that should be reported to the Bureau for Public Health include:

- Outbreaks or clusters of disease (immediately reportable to the local health department)
- Reportable diseases (as defined by the Legislative Reportable Disease Rule, 64CSR7)
- Unusual conditions or emerging infectious diseases (reportable within 24 hours to the local health department)

For more information, please visit www.dide.wv.gov or call the Division of Infectious Disease Epidemiology (DIDE) at 1 (800) 423-1271, extension 1; (304) 558-5358, extension 1; or the answering service at (304) 925-9946.

This message was directly distributed by the West Virginia Bureau for Public Health to local health departments and professional associations. Receiving entities are responsible for further disseminating the information as appropriate to the target audience.

Categories of Health Alert messages:

Health Alert: Conveys the highest level of importance. Warrants immediate action or attention.

Health Advisory: Provides important information for a specific incident or situation. May not require immediate action.

Health Update: Provides updated information regarding an incident or situation. Unlikely to require immediate action.
